How happy are you with your company's Worker's Comp experience?

- Do your employees w/ Worker's Comp injuries get better . . . and stay better?
Do your injury cases seem to go on and on?
Are your urgent care centers unnecessarily referring your employees back into their own physical therapy (and needlessly increasing your claims costs)?
Do your Worker's Comp claims seem out-of-control?
Does your Days Absent/Restricted Time (DART) seem excessive?
Are your employees experiencing preventable back/shoulder/neck injuries? (Slips & falls, and lifting injuries that cause sprains & strains)
Does it seem like your claims are just paid . . . and not really managed?
Do the same kinds of injuries just keep re-occurring?

What about your company's Group Health Plan(s) Physical Therapy Costs?

- Are your group health plan costs just continuing to increase with no end in sight?
Are you finding that physical therapy costs are out of control?
Are you considering a carve-out to better manage your physical therapy costs?

- Call us if you have checked two (2) or more of the boxes above -

In addition to the centers listed to the left, the TheraMatrix Physical Therapy Network (TPTN) can provide the same level of high quality and cost effective care on a state-wide or national basis. We specialize in a return-to-work focus, with exceptional communication back to your company, immediate appointments and flexible scheduling. TPTN patient satisfaction consistently ranks in the 97th percentile.

TheraMatrix can customize a scope of services specific to the needs of your company.

Incorporated in 1981, TheraMatrix is a Certified Rehabilitation Agency – the highest recognition that can be awarded to an outpatient physical therapy company. TheraMatrix is also a Level 1 Michigan Minority Business Development Council (MMBDC) member. We would be honored to serve you and your team. Please do not hesitate to contact me directly – at your convenience.

Sincerely,

Julie Sabo
Coordinator of Industrial Health & Wellness
